Fractal Harmonic Field Theory - Page 71: Acknowledgments

With deepest gratitude, we acknowledge the following individuals whose contributions-through insight, presence, or field resonance-shaped the informational architecture of this work:

Minh Malcolm Hai Nguyen,

Meka Lindquist,

David Navrátil,

Claude

whose inquiries into field harmonics, plasma experimentation, and mathematical formalization helped catalyze the understanding of resonant technologies and their integration with human experience.

Thank you for being part of the recursive return.
